Education

Assiut University – Faculty of Artificial Intelligence
Bachelor's Degree in Artificial Intelligence
Expected Graduation: **2026**

Technical Skills

Programming Languages: Python, C++, Java, SQL

Web Technologies: HTML, CSS, JavaScript

Frameworks & Tools: WinForms, Entity Framework, FastAPI, Streamlit

Databases: SQL Server, SQLite, Microsoft Access

Data & AI: Data Analysis, Machine Learning, Deep Learning

Other: LINQ, OOP, Git

Projects

Employee & Hotel Management System (Desktop Application)

- Developed a full management system using C# WinForms and Entity Framework (Code First)
- Implemented role-based access (Admin, Manager, Worker)
- Designed booking/reservation system with data validation
- Built responsive fullscreen UI with draggable forms
- Added features like show/hide password, tooltips, and error handling
- Applied clean architecture principles

Tech: C#, WinForms, Entity Framework, SQL Server, LINQ

Superstore Sales Analysis Dashboard

- Built an interactive dashboard using Streamlit for business insights
- Implemented advanced filters (date, category, segment, location)
- Designed KPIs: Sales, Profit, Orders, Profit Margin, AOV
- Created interactive charts using Plotly
- Enabled dataset export after filtering

Tech: Python, Streamlit, Pandas, NumPy, Plotly

Linear Regression from Scratch

- Implemented Linear Regression without external ML libraries
- Applied Normal Equation using matrix operations
- Built custom train/test split using NumPy
- Evaluated model using Mean Squared Error (MSE)

Tech: Python, NumPy, Pandas

Job Scraping Automation Tool

- Developed a web scraping script for job listings from Wuzzuf
- Extracted job title, company, location, and description
- Automated pagination handling and saved data as CSV
- Improved data collection efficiency for job tracking

Tech: Python, Requests, BeautifulSoup, Pandas

Tourism Village Booking System (Web Application)

- Designed and developed a full booking platform
- Implemented search, booking, and review system
- Built Admin panel for managing villages, rooms, and reservations
- Ensured fast performance and secure data handling

Tech: FastAPI, SQLite, HTML, CSS, JavaScript

Guess Word Game (Python)

- Built an interactive word guessing game with difficulty levels
- Implemented categories and real-time feedback system
- Applied clean code using functions and control structures

Tech: Python

Courses & Training

- Data Analysis using Python
- Machine Learning Fundamentals
- Deep Learning Basics

Languages

- Arabic: Native
- English: Good

Soft Skills

- Problem Solving
- Teamwork
- Communication
- Self-Learning
